1. Purpose/Objective 2

2. Scope 2

3. Definitions 2

4. Approved Engineering Contractors 2

1. Purpose/Objective

The purpose of this document is to identify approved engineering contractors that interconnection customers shall utilize to provide engineering services for a facility that Duke Energy Indiana will own and operate in the future.

2. Scope

On April 19, 2018, the Federal Energy Regulatory Commission (FERC) issued its final rule of Order 845, addressing reform of generator interconnection procedures and agreements for generators of more than 20 megawatts (MW). To interconnect generation projects to the grid, interconnection customers and transmission providers must coordinate the construction and ownership of new transmission line facilities, a substation at the point where the generation will interconnect with the grid, and, if necessary, any additional upgrades to the transmission providers transmission system required to handle the increased generation capacity.

In addition, order No. 845 allows interconnection customers the option to build transmission provider’s interconnection facilities, which will then be owned and maintained by the transmission provider.

3. Definitions

List of Approved Contractors - shall mean a list developed by each Transmission Owner and published in a PJM Manual of (a) contractors that the Transmission Owner considers to be qualified to install or construct new facilities and/or upgrades or modifications to existing facilities on the Transmission Owner’s system, provided that such contractors may include, but need not be limited to, contractors that, in addition to providing construction services, also provide design and/or other construction-related services, and (b) manufacturers or vendors of major transmission-related equipment (e.g., high-voltage transformers, transmission line, circuit breakers) whose products the Transmission Owner considers acceptable for installation and use on its system.

Interconnection Customer – A person or entity that interconnects a distributed generation facility to an electric distribution system.

Transmission Provider – Any public utility that owns, operates, or controls facilities used for the trans-mission of electric energy in interstate commerce. (i.e., Duke Energy)

4. Approved Engineering Contractors

Below is a list of approved engineering contractors that the interconnect customer shall utilize for projects in the Duke Energy Indiana service territory.

4.1. Substation Engineering

- Burns & McDonnell (Contact: Tyler Smith)

4.2. Protection and Controls Engineering

- Burns & McDonnell (Contact: Tyler Smith)

4.3. Transmission Line Engineering

- Burns & McDonnell (Contact: Tyler Smith)
- Commonwealth Associates (Contact: Shane Hays)
- HDR (Contact: Josh Bledsoe)

Document Approval Form

Issued 06/23/2025

Section A: Document identification and type of action [\(Instructions for completing form on page 2\)](#)

Note: To avoid issues with the Document Approval Form, download/ save a copy of the form to your device from Cast Pro before filling out the form. Avoid using a browser to fill out form.
